# **Executive Summary**

The following report summarizes the monthly data generated as part of the Richmond Community Air Monitoring Program (RCAMP). RCAMP is an independent initiative designed to provide air quality readings to the general public and educate the community about what is in the air. The air quality monitoring equipment and its installation was funded by Chevron in consultation with the City of Richmond. Ongoing operation, maintenance and data reporting is managed by Argos Scientific, Inc., with direction from the City Manager's Office, and input from Chevron and community representatives.

This report details the information collected by the operation of the open path fence line monitoring systems installed near the perimeter of Chevron's Richmond Refinery. The report explains the data and measurements of target compounds (benzene, toluene, sulfur dioxide, p-xylene, carbon disulfide and hydrogen sulfide) for the month of December 2013, at the fence line monitoring locations located near the Richmond Refinery perimeter, adjacent to Point Richmond, Atchison Village and North Richmond.

#### **Operational Performance Events**

During December 2013 there was one event that affected the monitoring system on the refinery perimeter that is adjacent to North Richmond. On November 29, 2013 the data acquisition system froze. An Argos technician was dispatched on December 02, 2013 when access to the site became possible. The system was restored to operational status by servicing and restarting the system.

#### **Maintenance Activities**

Routine maintenance and quality assurance/quality control (QA/QC) for the open path fence line monitoring systems occurred on December 09, 2013 and December 16, 2013.

#### **Summary Findings**

The following was noted from the monthly results of the monitoring activities:

- At the refinery perimeter that is adjacent to Point Richmond, the maximum sulfur dioxide concentration was recorded when the winds were from the East-to-southeast. The maximum toluene value was recorded when winds were from the South-to-southwest;
- At the refinery perimeter that is adjacent to Atchison Village, the
  maximum benzene concentration was recorded when the winds were
  from the Northeast. The maximum sulfur dioxide value was recorded
  when winds were from the Southeast. The maximum toluene value was
  recorded when winds were from the Northeast. The maximum p-xylene
  value was recorded when winds were from the Northeast;

• At the refinery perimeter that is adjacent to North Richmond, the maximum sulfur dioxide concentration was recorded when the winds were from the North-to-northeast. The maximum toluene value was recorded when winds were from the South-to-southwest. The maximum p-xylene value was recorded when winds were from the South-to-southwest.

NOTICE	

#### 2 Introduction

Table 2.1 lists the target compounds monitored during the month of December 2013, at the fence line monitoring systems near the refinery perimeter and adjacent to Point Richmond, Atchison Village and North Richmond. Each site has an open path Ultra Violet (Open Path UV) air monitoring system and an open path tunable diode laser (TDL) air monitoring system, see Appendix C for an equipment location map.

Table 2.1: Target Compounds Measured by Fence Line System

Compound	Instrument
Benzene	Open Path UV
Toluene	Open Path UV
Sulfur Dioxide	Open Path UV
p-Xylene	Open Path UV
Carbon Disulfide	Open Path UV
Hydrogen Sulfide	TDL

In addition each site is equipped with a meteorological station measuring the following parameters:

- Wind speed
- Wind direction
- Temperature
- Relative humidity

The results of the measurements performed by the system for the month of December 2013, are presented in the sections that follow.

#### 3 Results

#### **Monthly Maximum Fence Line Detections**

This section of the report presents the results for the monitoring performed for the month of December 2013. Tables 3.1, 3.2 and 3.3 list the maximum monthly concentrations measured at each of the sites for the monitoring period.

Table 3.1: Maximum Detected Concentrations Measured by the Fence Line Monitoring Equipment Located Adjacent to Point Richmond

Compound	Date	Time	Concentration (ppb)	Toxicity Summary (ppb)	Wind Direction
			(ppb)	Short-term/acute (for a 6-hour exposure) 1: 433	Direction
Benzene	Nothing Detected	Nothing Detected	Nothing Detected	Long- term/chronic <sup>2</sup> : 20	Nothing Detected
Sulfur Dioxide	12/30/2013	07:40 PM	113	Short-term/acute (for a 1-hour exposure) <sup>1</sup> : 230	East-to- southeast
				Short-term/acute (for a 1-hour exposure) 1: 8600	
Toluene	12/21/2013	12:10 AM	5	Long- term/chronic <sup>2</sup> : 70	South-to- southwest
				Short-term/acute (for a 1-hour exposure) <sup>1</sup> : 6285	
p-Xylene	Nothing Detected	Nothing Detected	Nothing Detected	Long- term/chronic <sup>2</sup> : 200	Nothing Detected
•				Currently there are no standards set for evaluating risks	
Carbon Disulfide	Nothing Detected	Nothing Detected	Nothing Detected	of exposure to Carbon Disulfide	Nothing Detected
Hydrogen	Nothing	Nothing	Nothing	Long-	Nothing

Table 3.3: Maximum Detected Concentrations Measured by the Fence Line Monitoring Equipment Located Adjacent to North Richmond

Compound	Date	Time	Concentration (ppb)	Toxicity Summary (ppb)	Wind Direction
			(84%)	Short-term/acute (for a 6-hour exposure) 5: 433	
Benzene	Nothing Detected	Nothing Detected	Nothing Detected	Long- term/chronic <sup>6</sup> : 20	Nothing Detected
Sulfur Dioxide	12/13/2013	03:35 AM	104	Short-term/acute (for a 1-hour exposure) <sup>5</sup> : 230	North-to- northeast
				Short-term/acute (for a 1-hour exposure) <sup>5</sup> : 8600	
Toluene	12/13/2013	08:40 AM	126	Long- term/chronic <sup>6</sup> : 70	South-to- southwest
				Short-term/acute (for a 1-hour exposure) 5: 6285	
p-Xylene	12/13/2013	08:40 AM	26	Long- term/chronic <sup>6</sup> : 200	South-to- southwest
				Currently there are no standards set for evaluating risks of exposure	
Carbon Disulfide	Nothing Detected	Nothing Detected	Nothing Detected	to Carbon Disulfide	Nothing Detected
Hydrogen Sulfide	Nothing Detected	Nothing Detected	Nothing Detected	Long- term/chronic <sup>6</sup> : 8	Nothing Detected

Tables 3.1, 3.2 and 3.3 above indicate that the fence line equipment detected compounds at each location. The concentrations of these compounds were significantly lower than the toxicity standards established by the State of California.

#### 3.2 Monthly Fence Line Detections

The sections below detail the compounds detected at each of the monitoring locations. Where there were no detections for the month these graphs are not included. The data is grouped by sampling site with the associated meteorological data included.

<sup>&</sup>lt;sup>5</sup> California Office of Environmental Health Hazard Assessment, Acute Toxicity Summary (http://oehha.ca.gov/air/hot\_spots/2008/AppendixD2\_final.pdf)

<sup>&</sup>lt;sup>6</sup> California Office of Environmental Health Hazard Assessment, Chronic Toxicity Summary (http://oehha.ca.gov/air/hot\_spots/2008/AppendixD3\_final.pdf)

#### 3.2.1 Point Richmond

Figures 3.1 to 3.4 show the gas detections for the month of December 2013 at the fence line monitoring system near the refinery perimeter and adjacent to Point Richmond. In addition wind speed and wind direction data measured by the system is reported. For the month of December 2013, benzene, p-xylene, carbon disulfide and hydrogen sulfide were not detected by the system. The data is plotted on a logarithmic scale.

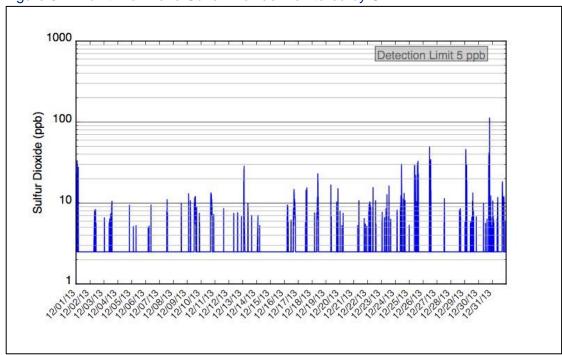

Figure 3.1: Point Richmond Sulfur Dioxide Monitored by UV

Figure 3.1 shows that the maximum concentration of 113 ppb was detected on December 30, 2013 at 07:40 PM. Toxicity levels established by the State of California are listed in tables 3.1 above.

1000 Detection Limit 5 ppb 100 Toluene (ppb) 10

Figure 3.2: Point Richmond Toluene Monitored by UV

Figure 3.2 shows that the maximum concentration of 5 ppb was detected on December 21, 2013 at 12:10 AM. Toxicity levels established by the State of California are listed in tables 3.1 above.

#### 3.2.1.1 Point Richmond Wind Speed and Wind Direction

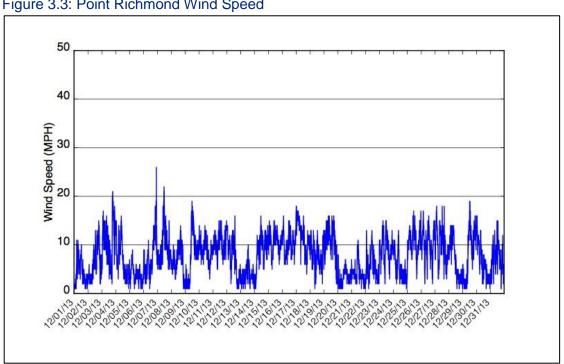

Figure 3.3: Point Richmond Wind Speed

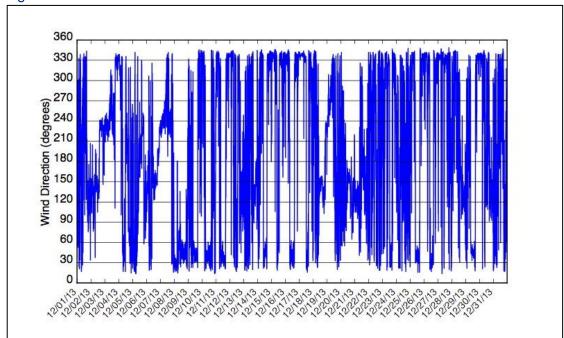

Figure 3.4: Point Richmond Wind Direction

#### 3.2.2 Atchison Village

Figures 3.5 to 3.10 show the gas detections for the month of December 2013 at the fence line monitoring location located near the refinery perimeter and adjacent to Atchison Village as well as the wind speed and wind direction data measured by the system. For the month of December 2013, carbon disulfide and hydrogen sulfide were not detected. The gas data is plotted on a logarithmic scale.

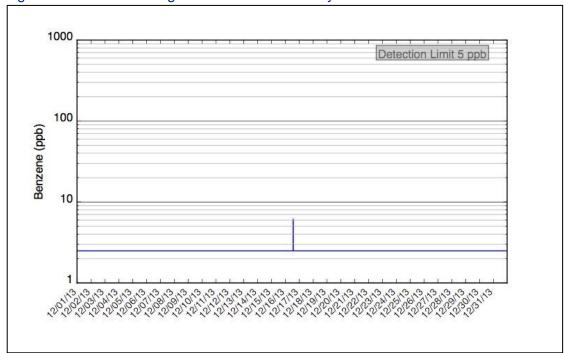

Figure 3.5: Atchison Village Benzene Monitored by UV

Figure 3.5 shows that the maximum concentration of 6 ppb was detected on December 16, 2013 at 02:00 PM. Toxicity levels established by the State of California are listed in tables 3.2 above.

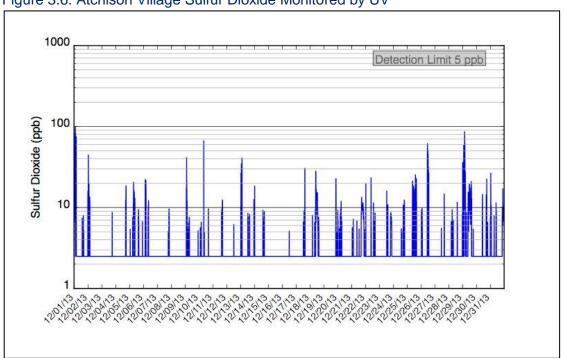

Figure 3.6: Atchison Village Sulfur Dioxide Monitored by UV

Figure 3.6 shows that the maximum concentration of 100 ppb was detected on December 01, 2013 at 02:35 AM. Toxicity levels established by the State of California are listed in tables 3.2 above.

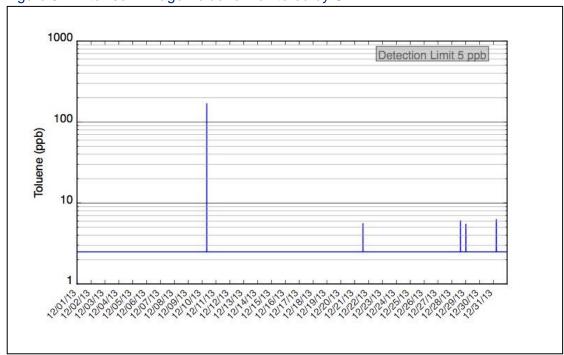

Figure 3.7: Atchison Village Toluene Monitored by UV

Figure 3.7 shows that the maximum concentration of 170 ppb was detected on December 12, 2013 at 08:50 AM. Toxicity levels established by the State of California are listed in tables 3.2 above.

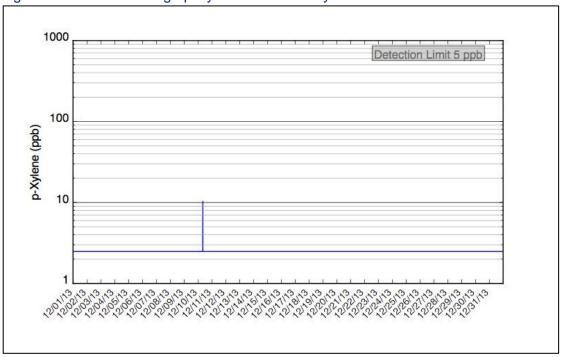

Figure 3.8: Atchison Village p-Xylene Monitored by UV

Figure 3.8 shows that the maximum concentration of 10 ppb was detected on December 12, 2013 at 08:50 AM. Toxicity levels established by the State of California are listed in tables 3.2 above.

#### 3.2.2.1 Atchison Village Wind Speed and Wind Direction

Figure 3.9: Atchison Village Wind Speed

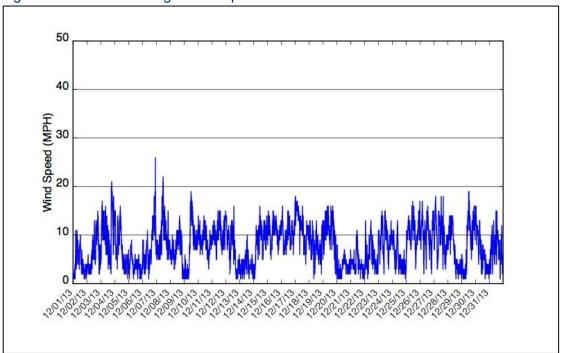

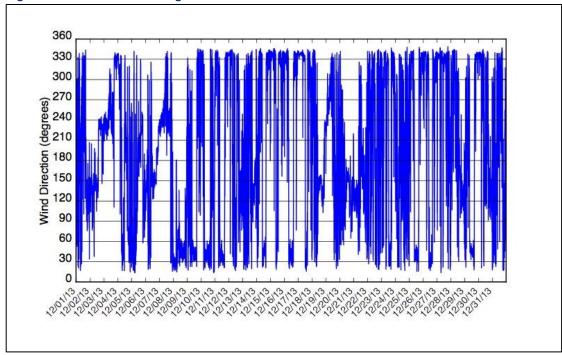

Figure 3.10: Atchison Village Wind Direction

#### 3.2.3 North Richmond

Figures 3.11 to 3.15 show the gas detections for the month of December 2013 at the fence line monitoring location located near the refinery perimeter and adjacent to North Richmond as well as the wind speed and wind direction data measured by the system. For the month of December 2013, benzene, carbon disulfide and hydrogen sulfide were not detected. The gas data is plotted on a logarithmic scale.

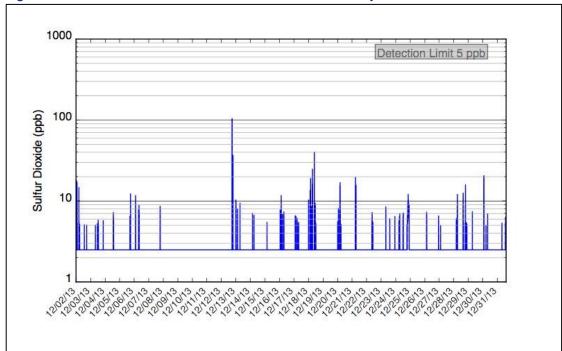

Figure 3.11: North Richmond Sulfur Dioxide Monitored by UV

Figure 3.11 shows that the maximum concentration of 104 ppb was detected on December 13, 2013 at 03:35 AM. Toxicity levels established by the State of California are listed in tables 3.3 above

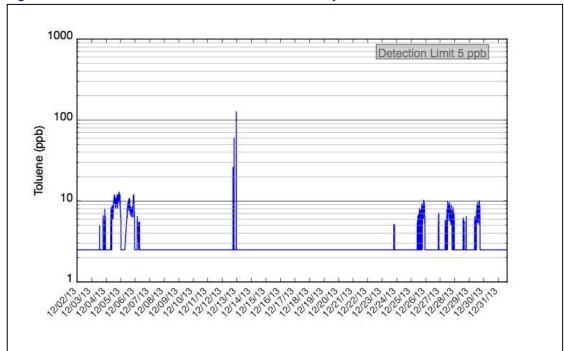

Figure 3.12: North Richmond Toluene Monitored by UV

Figure 3.12 shows that the maximum concentration of 127 ppb was detected on December 13, 2013 at 08:40 AM. Toxicity levels established by the State of California are listed in tables 3.3 above.

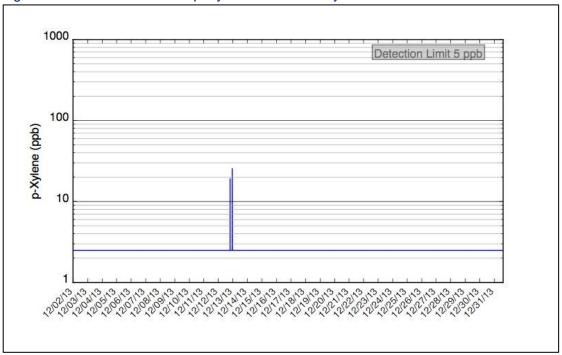

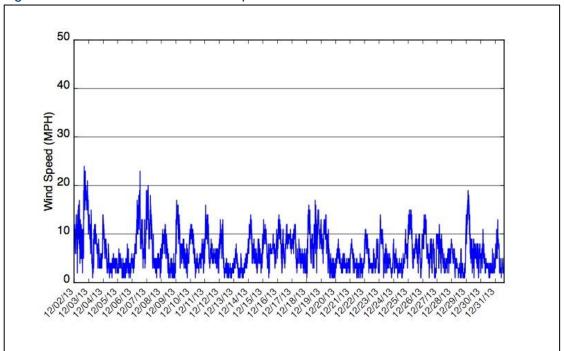

Figure 3.13: North Richmond p-Xylene Monitored by UV

Figure 3.13 shows that the maximum concentration of 26 ppb was detected on December 13, 2013 at 08:40 AM. Toxicity levels established by the State of California are listed in tables 3.3 above.

# **4 Operational Performance Events**

During December 2013 there was one event that affected the monitoring system on the refinery perimeter that is adjacent to North Richmond. On November 29, 2013 the data acquisition system froze. An Argos technician was dispatched on December 02, 2013 when access to the site became possible. The system was restored to operational status by servicing and restarting the system.

## **5** Maintenance Activities

Routine maintenance and quality assurance/quality control (QA/QC) for the open path fence line monitoring systems occurred on December 09, 2013 and December 16, 2013.

### **6 Summary of Findings**

The following was noted from the monthly results of the monitoring activities:

- At the refinery perimeter that is adjacent to Point Richmond, the maximum sulfur dioxide concentration was recorded when the winds were from the East-to-southeast. The maximum toluene value was recorded when winds were from the South-to-southwest;
- At the refinery perimeter that is adjacent to Atchison Village, the
  maximum benzene concentration was recorded when the winds were
  from the Northeast. The maximum sulfur dioxide value was recorded
  when winds were from the Southeast. The maximum toluene value was
  recorded when winds were from the Northeast. The maximum p-xylene
  value was recorded when winds were from the Northeast;
- At the refinery perimeter that is adjacent to North Richmond, the
  maximum sulfur dioxide concentration was recorded when the winds
  were from the North-to-northeast. The maximum toluene value was
  recorded when winds were from the South-to-southwest. The maximum
  p-xylene value was recorded when winds were from the South-tosouthwest.

# Appendix A: Maintenance and Calibration Activities

The following calibration activities were recorded at the site.

## Point Richmond QA/QC

Instrument	Compound	Date	Time	Passed Yes/No
UV	Benzene, Toluene, Sulfur Dioxide, p-Xylene	12/09/2013	07:53 AM	Yes
TDL	Hydrogen Sulfide	12/09/2013	07:48 AM	Yes
UV	Benzene, Toluene, Sulfur Dioxide, p-Xylene	12/16/2013	01:55 PM	Yes
TDL	Hydrogen Sulfide	12/16/2013	01:53 PM	Yes

## Atchison Village QA/QC

Instrument	Compound	Date	Time	Passed Yes/No
UV	Benzene, Toluene, Sulfur Dioxide, p-Xylene	12/09/2013	07:29 AM	Yes
TDL	Hydrogen Sulfide	12/09/2013	07:26 AM	Yes
UV	Benzene, Toluene, Sulfur Dioxide, p-Xylene	12/16/2013	01:42 PM	Yes
TDL	Hydrogen Sulfide	12/16/2013	01:34 PM	Yes

## North Richmond QA/QC

Instrument	Compound	Date	Time	Passed Yes/No
UV	Benzene, Toluene, Sulfur Dioxide, p-Xylene	12/09/2013	08:50 AM	Yes
TDL	Hydrogen Sulfide	12/09/2013	08:50 AM	Yes
UV	Benzene, Toluene, Sulfur Dioxide, p-Xylene	12/16/2013	02:39 PM	Yes
TDL	Hydrogen Sulfide	12/16/2013	02:37 PM	Yes

# Appendix B: Website Message Board Logs

The following operational issues were noted on the Richmond Refinery Community Website:

- 12/09/2013 9:12 Argos is on site to perform monthly maintenance. UV, TDL, and MET systems may be temporarily offline for the next few hours. The message board will be updated when QA/QC work is complete.
- 12/09/2013 13:21 QA/QC work has been completed.
- 12/12/2013 10:06 The North Richmond Community trailer installation is complete and is now reporting data to the website
- 12/16/2013 10:16 Argos is on site to perform instrument checks for the fence line. The message board will be updated when work is complete.
- 12/16/2013 14:52 Instrument checks for the fence line instruments have been completed.

# **Appendix C: Equipment Location**
